The politicians are destroying the USA, (as well as the whole world), by passing laws, controlling too many facets of science. They obviously do NOT know anything about science, but they keep on acting like they know it all.... they do NOT!!

I have sent **(13)** letters, over a period of time, (listed on my website, www.cifaldi.org), to **Discover Magazine**, regarding subjects of interest to me, which were published in different issues of your **Discover Magazine**.

Some of the letters I sent were germane to the idiotic laws, currently, (2010), being passed, or proposed! Those laws will hurt the world population, as well as the common everyday taxpayer and his dependents.

Other letters, contained my thoughts, on the subjects discussed/ revealed, in your magazine, such as, my proposal for the possible avoidance of an Asteroid strike on earth, (by usage of an Electron/proton gun)!

The Wind should be the energy source, of the future, because of the power of the “Double-Quadruple Principle”. See the following links!

Coupled with the knowledge, that in less than 150 years, both oil-reserves and Uranium ore supplies, will be depleted, this renewable-energy source, should take top priority!

Take a peek at my Letters to **Discover**, (as shown on my Website). You should find those articles and others, informative, factual, and hopefully, even interesting!
