Re: Topics of Importance to the USA/Earth

Dear Mr. Ruddy:

Much has been said/written, about **(2)** topics lately. Namely, Global Warming and Asteroid Dangers! Unfortunately, most were said by politicians, (who still have **NOT** learned, that you can **NOT** spend more money than you take in,..... never mind lacking a scientific background.)!

I still find it hard to believe that someone like former V. President Al Gore, with **NO** scientific credentials, (who has made millions, becoming an authority on Global warming), bamboozling/muzzling the scientific community. **NOT** only do his conclusions **NOT** hold water, but his proffered remedies will needlessly cost the USA/World, **TRILLIONS** of **dollars!**

In the past, I have served as personal energy adviser to various politicians, so that the statement I make herein, is from personal knowledge, among them and many, many, of their colleagues! **They really do NOT have a clue!** The politicians I served as personal energy advisor, were: a **State Senator** , a **State Speaker of the House**, a **Mayor**, a **Congressman**, & a **Freeholder Director**

If you will visit, or otherwise have one of your assistants visit my Website at www.cifaldi.org , you will find a number of scientific documents that I have authored, among which as well as treatise on..... **“Beneficial Global Warming”(34 Pages);... Asteroid De-Orbiting (6 Pages);..... My Pedigree [Carmine Cifaldi] (11 Pages)!**
